Copy of hand-written letter

January 30, 1974

Dear Mr. President

On January ninth I could not bring myself to wish you a Happy Birthday because the word "happy" did not ring true.

I think your great speech tonight was a turning point. Now I am convinced that you will have joy in 1974 and into the future as you go forward from the severest testing ever endured by a President to complete your record as our greatest President.

Sincerely,

s/Anne Armstrong

Miss Woods -

This is probably presumptuous
of me, but if possible I would
appreciate your giving the
enclosed note to the President.

Thank you,
